How to install and configure the Java Development Kit in Windows XP, Vista and 7 1. Download the Java JDK

a. Go to http://java.sun.com/javase/downloads/index.jsp

b. click on previous releases in the top right under Java SE Downloads

c. Under Java SE click on Java SE 6

d. Click on the first link, Java SE Development Kit 6u45

\*\* At this point you may or may not be required to make an Oracle account to download this previous version. If you are asked to do so, make an account and start the download. Accept the terms and conditions, and find the appropriate download file. Windows users, you are either x86 or x64. If unsure, go to start, right click on computer and select properties. A window will pop up with your system settings. Look for system type, and it will tell you whether x86 or x64.

## 2. Install JDK

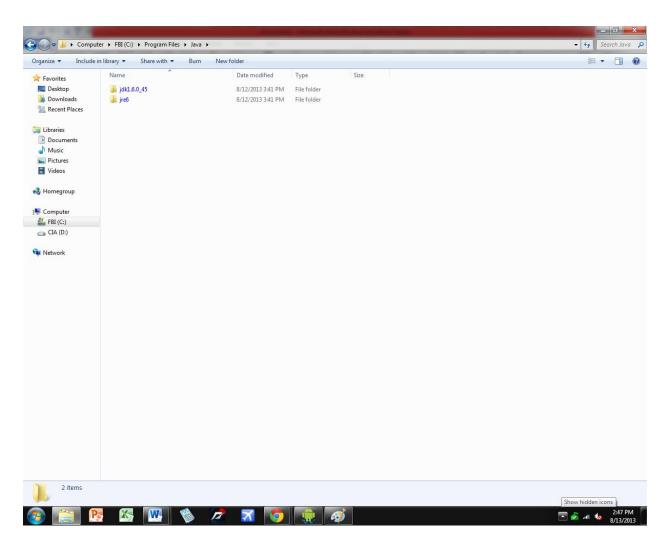

a.Leave all other options alone and click Next.

b. It may take a few minutes to install...you should get a snack  $\odot$  Click Finish when done Note: You don't have to register Java with Sun.

3. Find the Java JDK Path.

a. Once Java installed, Open My Computer and open "C"->"Program Files"->"Java"

\*\* "Program Files (x86)"-> "Java" may or may not have the file. Check both just in case

b. click the folder that starts with jdk

c. copy the path from the address bar. (double click, select all, copy)

## should look like C:\Program Files\Java\jdk1.6.0\_45

4. set the path

a. Right click on computer and select properties

b. click on advanced system settings, then environment variables

c. in the box saying system variables, find the variable titled "Path" and double click it.

d. at the end of "variable value" put a semicolon(;) and the copied address from earlier (something like C:\Program Files\Java\jdk1.6.0\_45) at the end of that type "\bin" without quotes.

You should now have something like C:\Program Files\Java\jdk1.6.0\_45\bin This is what your screen should look like up to

## 6. Install <u>ObjectDraw</u> (Optional)

a. In order to use objectdraw, copy theObjectDraw.jarfile and paste it into the following locations: (Please note that your location may vary, the important stuff is BOLD)

i. "C:\Program Files\Java\jdk1.X.X\_XX\jre\lib\ext\"

ii. "C:\Program Files\Java\jre6\lib\ext\"

If everything is working, then congratulations, you've successfully followed a guide! Happy Java-ing!
